Thoughts as medicine

How to activate mental self-healing with the findings of neuroscience

Your thoughts can heal you!

Self-healing through mental strength? Can we really use the power of thought to overcome serious illness and alleviate pain? Does positive thinking ensure a long and happy life?

Dr Marcus Täuber, neurobiologist and mental coach, reveals the latest research into the healing power of our mind and has some explosive surprises in store.

Dr Marcus Täuber is a neurobiologist, lecturer at several universities and head of the Institute for Mental Success Strategies. As bestselling author and keynote speaker he gets to the core of the newest neuroscientific findings.

You are not your wound

How to heal successfully

Turn wounds into wonders – this is how you heal!

Childhood trauma can haunt you in many ways if you don't come to terms with your past: toxic relationships, mental and physical symptoms and the feeling of not living your life properly – to name just a few.

Katja Hinterleitner has been there herself. Through her work in the field of systemic healing, family constellations and by learning from wise teachers, she has successfully developed a holistic method to regain happiness.

In this book she shares the knowledge you need so that you too can live your life to the fullest and leave the pain behind long term.

You are allowed to heal

How your upbringing has shaped you, how to leave the scars of the soul behind and regain trust in yourself

Come to terms with you past and regain trust in yourself

We all have been influenced by what we experienced in childhood. Small and large traumas often only become noticeable in adult life. But most people do not even realise that these scars on our soul, made up of distorted or suppressed memories, guide and often misguide us in even the most basic everyday situations.

Warmheartedly and with great expertise psychologist Sophie Lauenroth explains that it is 'normal' for almost everyone to carry transgenerational wounds. With her method 'Understand - Change - Trust' she guides us towards longlasting self healing in three easy steps.

Guilt, shame and all that bullshit

My story from bouncer to trauma therapist – how you to rid yourself of all that mental rubbish and finally clear your head

From feeling powerlessness to feeling empowerment

In his gripping trauma biography, psychotherapist and former lawyer Philipp Ruland describes his impressive life story and shows us that we can do something about that trauma we all seem to carry around. Shaped by violence, abuse and neglect in his childhood and youth, he lived through dark times full of fights, alcohol and aggression. His journey takes him to becoming a bouncer – but eventually he finds his way to a new life through years of therapy, studying psychology and the help of people, he learned to trust.

His book is an inspiration for all those who are struggling with the effects of childhood trauma. He shows that healing is possible – and that every person has the power to start a new chapter in life.

© Sara-Emosivwe

Philipp Ruland, born in Saarbrücken in 1979, worked as a lawyer before deciding to study psychology. Already during his studies, he specialized in treatment of complex childhood trauma and the resulting secondary illnesses such as personality disorders, depression, eating disorders and psychosomatic illnesses.

In his psychological practice, Philipp Ruland supports people in coming to terms with their trauma history and guides them towards a stable and happy life.

carpe diem

Not my circus, not my monkeys

How to stop feeling responsible for everything

Bye-bye people pleasing!

Women are world champions at ‘taking care of everything and everyone’ – even when they don't have to. Nevertheless, taking on various responsibilities is often subliminally expected. While recognition for it stays rare.

Katharina Pommer sheds light on what is currently being discussed on a societal level as mental load and people pleasing, examining the fascinating aspect of where this feeling of ‘feeling responsible for everything’ actually comes from – and how women can shed it.

The inner child can just give me a break

Don't let your past bully you – you're less complicated than you think

Based on latest scientific findings this book shows that the inner child is given too much importance. The stress of self-discovery comes from false assumptions about ourselves. We think our inner workings are much more complicated than they actually are. In reality, we are much simpler, and we can use this fact to actually find balance.

Love hurts, love heals

How to heal your wounds and trust the cycle of love

How to (re)discover trust and real connection

We are all longing for connection and love – no matter if married almost all our life, head of heels for a new person or just living for ourself right now. The good news? We just need some courage.

With Juliane Steffen we take a holistic and psychologically founded journey to ourselves and the people we love. Along the four seasons which reflect the natural cycle of all our relationships – from contemplation in winter to the time of harvest in autumn – we learn to let go of fears, break old patterns, understand crises as valuable phases of growth and inner trust.

Experience true healing and a love that is deeply fulfilling and long-lasting.

© Soul-Studio

Juliane Steffen is a relationship therapist and coach. She combines systemic **trauma-sensitive work** with **modern spirituality** and, as a trained yoga teacher, incorporates conscious **body experience and meditation**. She helps people change stressful relationship patterns and free themselves from issues that have been passed on transgenerationally.

As @juilanesteffen.beziehungsvoll, she inspires around **160.000 people on Instagram, Tik Tok and with her podcast beziehungsVoll.**

Generation TikTok

Don't be afraid of social media and AI – how we can guide our children into the digital future

How to make Social Media safe for our children

The rapid development of digitalisation presents us with the challenge of rethinking education and upbringing! Teacher and education technologist Niko Kappe analyses the connections between digital media and our society in a pointed and fact-based way. In doing so, he dispels deep-seated prejudices and makes differentiated reference to the latest developments.

Niko Kappe knows: Growing up without technology is impossible. Rather than avoiding it, he shows us how to make Social Media and AI safe for our children.

Once upon a time there was a chicken

An expedition through the history of humans and chickens

The chicken craze lives on!

For thousands of years, the chicken has been the faithful companion and secret hero of our cultural history. But how did this extraordinary connection with the once so shy jungle fowl come into being? Astrid Drapela takes us on a humorous journey of discovery and takes us from the early rice farmers of Southeast Asia to ancient Rome, from the long-gone Avar Empire via cockfights and banquets to the chicken coop of the future.

A captivating expedition through the astonishing relationship of humans and chickens.
